

Vivian Okechukwu

Frontend Developer — React, Next.js, TypeScript, Ecommerce

Port Harcourt, Nigeria | [email address] | [linkedin.com/in/\[your-handle\]](#) | [github.com/\[your-handle\]](#)

Summary

Frontend developer specializing in ecommerce, with hands-on experience building both custom headless storefronts and Shopify theme implementations. Comfortable working across the stack — from React/Next.js UI to database design and third-party payment integration. Based in Nigeria, open to remote roles.

Skills

React, Next.js, TypeScript, JavaScript, Tailwind CSS, Supabase (PostgreSQL, RLS, Storage), Shopify (Liquid, JSON templates), REST APIs, Paystack integration, Git/GitHub, Vercel deployment & CI/CD

Projects

ClareBags — Full Ecommerce Platform

Next.js, TypeScript, Supabase, Paystack

- Built a full ecommerce storefront with dynamic product catalog, color variants, and a persistent cart requiring no customer account.
- Implemented dual checkout paths: Paystack for online payment and a WhatsApp-based ordering flow, both writing to a shared order-tracking system.
- Built a secure admin dashboard with role-scoped database access via Postgres Row Level Security, including direct image uploads to cloud storage.
- Deployed on Vercel with automatic CI/CD from GitHub.

Amara & Co. — Custom Shopify Theme

Shopify, Liquid, JSON Templates

- Built a custom Shopify theme from scratch for a luxury lifestyle brand, working directly in Liquid and Shopify's JSON template architecture.
- Resolved theme architecture issues including CSS variable mismatches and full-bleed layout configuration.
- Delivered a considered, minimal-luxury visual identity aligned to brand direction.

Education

BSc, Microbiology
